## PROFESSIONAL SUMMARY

MERN Stack Developer with 6 months of experience in building scalable and efficient web applications. Proficient in React.js, Node.js, Express.js, and MongoDB, with expertise in API integration, authentication modules, and admin panel development. Passionate about creating dynamic, user-centric interfaces and robust backend solutions, with a strong focus on performance, security, and clean code practices.

## PROFESSIONAL EXPERIENCE

### MERN Stack Developer

Aug 2024 - Oct 2025

Invencolab

Developed and implemented the guest login module for an e-commerce jewellery platform.

Built cart and favourite modules, applying dynamic filters on the product page.

Designed and integrated the frontend UI with React.js and connected it to a backend powered by Node.js and MongoDB.

Integrated various APIs to enable CRUD operations, focusing on scalability and performance.

Developed a comprehensive admin panel and product management system with categories and variants.

Managed global state using Redux and developed an email server for automated notifications.

## PROJECTS

### Fitto Project

Developed a fully responsive e-commerce website optimized for mobile use. Enhanced UI/UX design to improve customer experience on mobile devices. Ensured compatibility with various mobile browsers and devices. Implemented multiple CRUD operations for managing products and user data.

### E-Commerce Jewellery Website

Developed the authentication module with guest login functionality. Designed and implemented frontend UI using React.js. Built and managed cart and order history modules. Implemented multiple CRUD operations for product and order management.

### Real-Time Chat Application

Built a real-time chat app using React.js, Node.js, Express.js, and Socket.IO. Implemented user authentication, message storage, and live user tracking. Added typing indicators and message timestamps for a smoother experience. Integrated push notifications using Firebase Cloud Messaging (FCM).

### **Pizza Shop Website**

Created a complete pizza ordering system using the MERN Stack. Developed cart, order tracking, and payment simulation features. Used Redux for global state management. Added an Admin Dashboard for managing products and orders.

## **EDUCATION**

### **Bachelor of Arts (B.A.)**

Rajasthan University

### **Full Stack Development Training in Full Stack Developer**

Nov 2023

Jaipur Institute of Computer Science (JICS)

## **CORE SKILLS**

- Languages: HTML, CSS, JavaScript   • Frontend: React.js
- Backend: Node.js, Express.js, MongoDB ,MySQL   • Tools: Git, Postman, ChatGPT ,Gemini Ai
- APIs: Integration and CRUD operations   • Cloudinary Image Upload   • Socket-io   • Bootstrap
